Learning Pathways

acQuire Learning

We build learning solutions for our customers in geoscientific information management concepts and the use of our technology. Regardless of whether you are a proficient super user or new to acQuire technology, acQuire Learning is designed to provide a learning curve that closely follows your workflows.

We accommodate all styles of learning

Our platforms and delivery techniques complement your busy schedule, including:

- Classroom learning using virtual desktop machines
- Self-paced online lessons
- Cloud-based virtual machines.

We make sure the learning 'sticks'

We follow the technique of Explain-Example-Practise. This ensures you not only understand the theory of each concept but also have hands-on experience in a simulated work setting.

acQuire Learning

Stretch your mind, not your schedule.
Our customers can choose a learning program that suits their budget and work schedule.

Tailor-made teaching.
We design our courses to fit our customers by focusing the learning on the aspects of our products applicable to their workflows.

Worldwide recognition.
We offer teaching programs that include fully accredited and non-accredited learning.

Credit for prior learning.
We recognise prior experience and knowledge of acQuire products through our Recognition of Prior Learning (RPL) process.
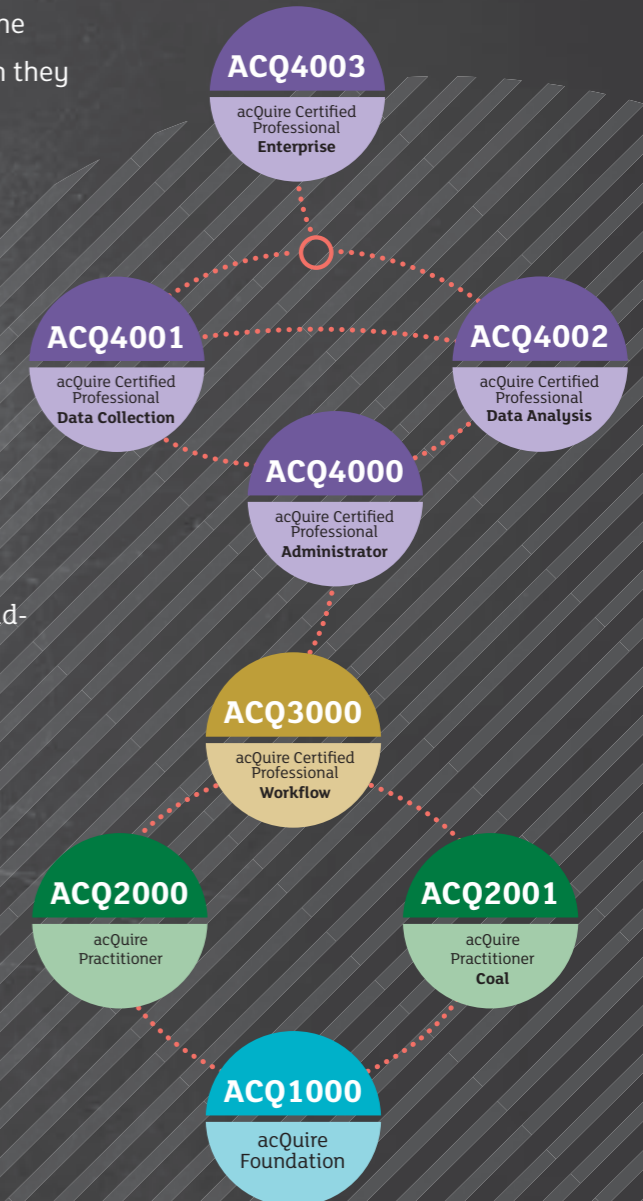

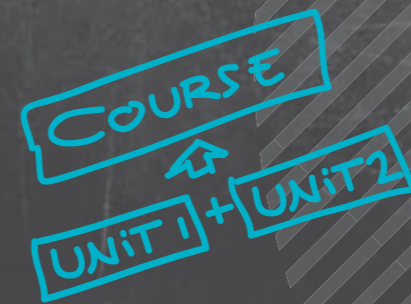

On-the-go, ongoing learning.
We will continue to develop more online courses.

acQuire Learning – for geoscientists by geoscientists

You can choose to study single units, e.g. ACQ100. The learning benefits become more comprehensive when they are grouped into courses and you complete all units of a course. For example, four units form the acQuire Practitioner (ACQ2000) course. Completing the acQuire Practitioner course is a prerequisite to the acQuire Certified Professional - Workflow (ACQ3000) course.

Subsequently, every acQuire Learning course builds on outcomes from other courses and forms a pathway that is tailored to your career and aspirations. Each unit and every course has assessments that lead to either certifications or world-wide recognised accreditations.

Learning Pathways – Employer Benefits

As an employer who made a significant investment in a geoscientific information management solution, you want to give your employees the opportunities to operate with the most efficient equipment, systems and processes. acQuire Learning is a contribution to the awareness and application of best practice (equipment, systems and processes). As acQuire software is the tool of choice for valid data storage and retrieval, your staff learns to improve workflows which are closely aligned with industry reporting codes (e.g. JORC 2012, CIM).

Learning Pathways – go your own way

Individual pathway accreditation can lead to a rewarding career path by extending your knowledge and skills beyond individual learning units.

Accreditation Benefits

Course accreditations are offered when you complete a set of units with clearly defined learning outcomes. By achieving competency in each of the course units, course accreditation is awarded to you in recognition of the level of proficiency. Within a course, units may be taken in any order as long as proficiency is achieved within 2 years. Competency in a unit is assessed by our course facilitators either by an online quiz or assignment(s).

On achieving accreditation, you:

- can add the appropriate post-nominal letters of the course to your name and CV*.
- will receive the acQuire course accreditation card, valid for 2 years.
- will receive a course completion certificate.

Post-nominal letters

*Post-nominal letters indicate that you hold a current certificate or accreditation as a practising professional who has successfully completed an acQuire course. acQuire Certified Professional (ACP) status is extended to the individual course participant; not a corporation, firm or a third party. The letters after your name identify you as a professional with a high level of product knowledge and proficiency in your industry.

Course number	acQuire course completed	Post nominal letters
ACQ2000	acQuire Practitioner	your name, AP
ACQ2001	acQuire Practitioner – Coal	your name, AP C
ACQ3000	acQuire Certified Professional – Workflow	your name, ACP W
ACQ4000	acQuire Certified Professional – Administrator	your name, ACP A
ACQ4001	acQuire Certified Professional – Data Collection	your name, ACP DC
ACQ4002	acQuire Certified Professional – Data Analysis	your name, ACP DA
ACQ4003	acQuire Certified Professional – Enterprise	your name, ACP E

acQuire Foundation (ACQ1000)

Work confidently and efficiently with your drilling and point sampling data using acQuire 4.

This introductory course covers foundation concepts of the GIM Suite. Offered in a training room environment, with online assessment.

Units Comprising ACQ1000

Concepts (ACQ100) 1 Day	Introduction to Relational Databases and the acQuire Data Model (ACQ101) 2 Days	Administrator Fundamentals (ACQ102) 1 Day
Use acQuire 4 to work with your data.	Become familiar with databases, terminology and how acQuire 4 stores data.	Gain insight into the fundamental skills and software tools needed to manage an acQuire 4 database, including acQuire 4 licensing.

acQuire Practitioner (ACQ2000)

Achieve the knowledge required to create and use workspace objects in an implemented environment.

For acQuire 4 users and database managers who require acQuire 4 knowledge and skills that can be used immediately in their acQuire 4 work environment. Offered in a training room environment with online assessment.

Prerequisite: acQuire Foundation (ACQ1000)

Units Comprising ACQ2000

Data Collection (ACQ200) 1 Day	Reporting (ACQ202) 1 Day	Introduction to the Structured Query Language (ACQ203) 2 Days	Importing Analytical Results (ACQ205) 2 Days	Quality Control of Analytical Results (ACQ206) 2 Days
Create and use acQuire 4 objects designed for entering or importing data into your acQuire 4 database.	Create and use report objects to analyse, display and print your data. Customise to include sub-reports and charts.	Learn how to use SQL, a database programming language, to enhance your acQuire 4 objects and query data in the acQuire 4 database.	Create and use an acQuire 4 import object to import analytical results received from a laboratory.	Create and use an acQuire 4 QAQC object to quality control analytical results received from a laboratory.

acQuire Practitioner – Coal (ACQ2001)

Achieve the knowledge required to create and use workspace objects in an implemented environment.

For acQuire 4 users and database managers who require coal-specific acQuire 4 knowledge and skills that can be used immediately in their acQuire 4 work environment. Offered in a training room environment with online assessment.

Prerequisite: acQuire Foundation (ACQ1000)

Units Comprising ACQ2001

Data Collection (ACQ200) 1 Day	acQuire 4 Coal (ACQ204) 1 Day	Reporting (ACQ202) 1 Day	Introduction to the Structured Query Language (ACQ203) 2 Days
Create and use acQuire 4 objects designed for entering or importing data into your acQuire 4 database.	Use acQuire 4 to work with a generalised workflow focussed on depth adjustment, coal quality and compositing of samples. Includes importing, reporting and exporting.	Create and use report objects to analyse, display and print your data. Customise reports to include sub-reports and charts.	Learn how to use SQL, a database programming language, to enhance your acQuire 4 objects and query data in the acQuire 4 database.

acQuire Certified Professional – Workflow (ACQ3000)

Focus on a comprehensive work approach with acQuire 4 in an implemented environment by understanding workflow and identifying workspace objects needed.

For acQuire 4 users and database managers who require workflow-focused knowledge and skills that can be used immediately in their acQuire 4 work environment. Offered in a training room environment through a series of workshops with online assessment.

Prerequisite: acQuire Practitioner (ACQ2000)

Units Comprising ACQ3000

Workflow Practitioner
(ACQ300)
5 Days

Learn about workflows and how to configure an acQuire 4 workspace to supplement workflow processes at your site.

acQuire Certified Professional - Administrator (ACQ4000)
Manage your acQuire 4 implementation to an advanced level.

For database managers who require a high level of acQuire 4 skills and knowledge in SQL and the acQuire Data Model. Offered in a training room environment with online assessment.

Prerequisite: acQuire Certified Professional – Workflow (ACQ3000)

Units Comprising ACQ4000

Advanced SQL, Script Objects and Data Tracking
(ACQ400)
5 Days

Build on your SQL knowledge to program in SQL to an advanced level, create script objects, apply control sheet programmability, install and utilise audit tools such as data tracking.

acQuire Certified Professional - Data Collection (ACQ4001)
Create and use data collection objects to an advanced level.

For database managers who require a high level of acQuire 4 skills and knowledge in data collection. Offered in a training room environment with online assessment.
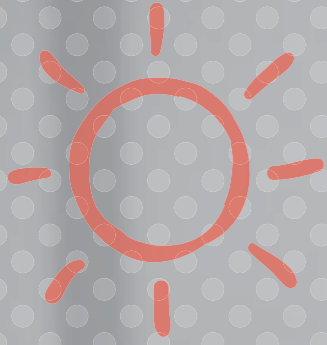

Prerequisite: acQuire Certified Professional – Administrator (ACQ4000)

Units Comprising ACQ4001

Advanced Importing, Data Entry and Depth Adjustment Tool
(ACQ401)
5 Days

Create advanced import objects for analytical results and wireline geophysics. Build advanced data entry objects with the option to include the Depth Adjustment Tool.

acQuire Certified Professional - Data Analysis (ACQ4002)

Work with grids, command line acQuire 4 and interrogate your data to an advanced level.

For database managers who require a high level of acQuire 4 proficiency and knowledge to work with their data. Offered in a training room environment with online assessment.

Prerequisite: acQuire Certified Professional – Administrator (ACQ4000)

Units Comprising ACQ4002

Grids, Derived Fields, QAQC and Report Objects, Command Line acQuire
(ACQ402)
5 Days

Master acQuire 4 managed grids. Create QAQC and report objects to an advanced level. Automate aspects of your workflow utilising command line acQuire 4. Work with derived fields.

acQuire Certified Professional - Enterprise (ACQ4003)
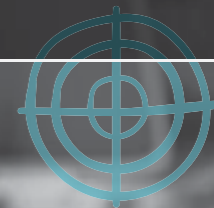

The master level accreditation.

For database managers who require comprehensive knowledge and experience in all facets of acQuire 4 in their implemented environment.

ACQ4003 comprises the following accreditations:

acQuire Certified Professional Administrator (ACQ4000)	acQuire Certified Professional Data Collection (ACQ4001)	acQuire Certified Professional QAQC and Reporting (ACQ4002)
