

Predict your future

Partner with the **acQuire Nova Network**

As a consultant in the Minerals and Energy community, you have far reaching influence on how geoscience information is managed. Your expertise is critical to a customer's needs for continued and future success.

acQuire offers the industry-leading Geoscience Information Management (GIM) solution. Our customers need flexible and reliable options when it comes to servicing their acQuire GIM Solution.

The Nova Network Partner program is part of acQuire's vision to offer the consulting community an opportunity of business growth in all areas of GIM.

Nuts and Bolts: What is Nova?

The Nova Network is a collaboration with acQuire certified consultants to provide implementation services of acQuire technology.

Nova Network consultants perform

- Pre-Implementation Services
- Implementation Assistance
- Post-Implementation Services
- Data Management Services

As a Nova Network Partner, you can deliver GIM services to Resource companies using acQuire's processes and technology.

Data Management Services can be delivered utilising the acQuire GIM Suite in an environment managed and administered by acQuire.

◁ expand your capabilities ▷

Nova Network Partner Program Subscription

Your business will continue to grow independently under your own brand. However, with the Nova Network endorsement, you will add acQuire's industry credentials to your consulting offering.

The Nova Network Partnership is scalable, and will grow with you, based on the number of accredited technologists operating in your business.

For more information, please contact the acQuire Nova Partnership Liaison at novapartner@acquire.com.au.

◀ add acQuire's strong industry credentials to your consulting business ▶

What's in it for Resource Companies?

Companies that manage geoscientific information will be able to optimise their acQuire GIM Solution by engaging a trusted and certified Nova Network Partner.

Access to a consulting base means availability of an expanded expertise and service spectrum. A strong network can deliver effective GIM services in all stages of project development and maintenance.
