

Data services you can trust

The Nova Network is a partnership of accredited geoscience data asset professionals who deliver high-quality Geoscientific Information Management (GIM) consulting services using acQure's software products and hosted IT services.

Use our global Nova Network to your advantage

- Engage a certified Nova Network Partner to optimally manage your geoscientific information.
- Access a diverse and experienced consulting base.
- Receive effective GIM services in all stages of project development and maintenance.
- Choose your preferred Nova Network Partner from our Nova Network directory based on service types and location.

Find a trusted, certified Nova Network Partner for your next project:
