EnviroSys 8.5 Release Overview

#### Summary

The latest release of EnviroSys, version 8.5, delivers a number of enhancements and improvements to your environmental data management software. It includes:

- The option to use Data Entry forms and enter data all within the one interface.
- ✓ More chain of custody and schedule options in Sample Management.
- ✓ Added options for triggering Actions and improved filters to search Actions.
- ✓ A range of fixes and enhancements requested by our users to continually improve your EnviroSys software experience.

#### Dynamic data entry

EnviroSys 8.5 gives you the ability to enter your environmental data directly into Data Entry Forms within the main EnviroSys interface. You can now work without the need to switch interfaces. Dynamically generate Data Entry forms from your saved Data Views or from scheduled runs in Sample Management.

# More Chain of Custody and schedule options in sample management

Sample Management now contains more Chain of Custody (CoC) formats, adding to the options introduced in our previous release. You can now use the following:

- Additional CoC Test Methods You have the flexibility to add test methods to a schedule which are not included in the sampling run statistics but are included on the CoC.
- **Substitute Location** You have the option to allow all substitute locations to be displayed as well as the planned location on the CoC.

We've listened to your feedback and added a raft of improvements for a better Action Management useability. These improvements provide additional flexibility when Actions are triggered and better creation/editing of the Action Rules. New filters give you greater control on how you track and manage Actions.

### EnviroSys mobile updates

The EnviroSys mobile app was updated in April and moved over to acQuire Technology Solutions' app stores. The new version, 3.1, includes improvements to data entry forms, Azure API Proxy integration plus general performance improvements and bug fixes to deliver a better app experience for you. Find out more at your preferred app store.

## Other improvements and more information

EnviroSys 8.5 includes a number of additional enhancements and improvements designed to help you easily manage your environmental data. This includes support for platforms such as SQL Server 2019 and Tomcat 9. To dive into all the inclusions for this release, please read our EnviroSys 8.5 technical release notes, available from our support team.

### Ready to upgrade?

If you're ready to upgrade to version 8.5, please reach out to us at <a href="mailto:support.envirosys@acquire.com.au">support.envirosys@acquire.com.au</a> to schedule in your upgrade time.

#### Previous releases:

Since the launch of our major release, EnviroSys 8.0, we've continually improved and enhanced our software. To find out what was included in previous releases, you can request a detailed release summary from acQuire.

Release	Status
8.5	Released June 2021
8.4	Released September 2020
8.3	Released April 2020
8.2	Released December 2019
8.1	Released June 2019
8.0	Released March 2019 Release of Compliance Module (AOC). Additional licence required.
