

EnviroSys 9 Release Overview

acQUIRE launches an important progression in its environmental data management solution – EnviroSys 9.

Our latest software release unveils an elegant and consistent look for our comprehensive environmental data management solution. Our focus is to continually improve the user experience, and this new release is optimised for quality and compliance-focused environmental data management. It features:

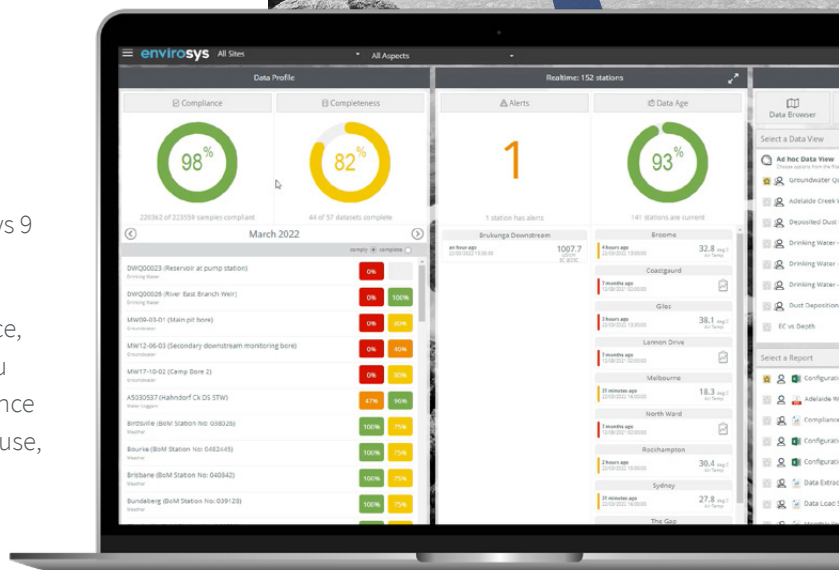

- ✓ A reimagined user experience and enhanced data management capabilities.
- ✓ An improved and simplified data input console for viewing and monitoring data feeds in one location.
- ✓ Secure and simplified cloud-based user management.
- ✓ An expanded EnviroSys support ecosystem.

All these changes are designed to make your environmental data management solution easier to learn, use and manage.

Reimagined user experience and enhanced data management capabilities

The EnviroSys experience has been reimagined, and EnviroSys 9 boasts an intuitive interface and a fresh, new style.

A new global menu is part of the updated and unified interface, providing clear access to the data management functions you need and use every day. You enjoy a more consistent experience across your EnviroSys software, making it easier to learn and use, with standardised styling and better navigation throughout.

All your data feeds in one location

EnviroSys 9 enhances the visibility of all your data feeds and streamlines data loading to ensure you have quicker access for other stakeholders. With the improved and simplified data input console, you can view and monitor all your data feeds in one location, regardless of their source. You can easily see your loaded data details and status, history, and any notes and attachments in one place. This means administrators can keep a close eye on incoming data and immediately address any issues.

Other improvements to data loading include:

- **Instant access to your loaded data, via the feed in your data input console.** Administrators no longer need to spend time searching for individual data loads.
- **Faster and streamlined data loading, with new bulk processing capabilities.** You can select multiple data loads, bulk-set their status, and unload or reload multiple data loads at one time.
- **Simplified data load mapping for faster resolution to any data loading issues.** You can review, correct, and action data load test methods and sample point mappings from a single console.

Type	Load #	Agent	Date	Duration	Status	Samples	Results	Location	Batchfile Load	Batchfile	Description
Data Load	14024	Groundwater	15/03/2022 14:28:51	20s	Completed	9	222	Groundwater	14024	14024	Groundwater
Data Load	14025	Groundwater	15/03/2022 14:21:18	30s	Completed	14	575	Groundwater	14025	14025	Groundwater
Data Load	14026	Groundwater	15/03/2022 14:15:48	30s	Completed	9	576	Groundwater	14026	14026	Groundwater
Data Load	14027	Drinking Water	28/02/2022 15:08:23	30s	Completed	8	8	Airflow	14027	14027	Drinking Water

Secure and simplified cloud-based user management

EnviroSys 9 fundamentally changes the way users are managed, with the addition of a named user model and integration with a cloud-based user and licence management platform.

acquire's licence platform, my.acquire, is introduced for EnviroSys 9 and all future releases. It allows customers to manage their own licenced seats and users, and adopts industry standard, best-practice user management. All acquire products employ this technology for customers all over the world.

Assign roles for greater data security across your system

Users can be assigned to one of three roles. This makes it easier for administrators to securely allocate software access and permissions to their team based on their user licence type and which functions are needed. To control data security, users can still be assigned to site and programs.

If you have already configured complex security within EnviroSys, your existing set-ups can be maintained as part of your upgrade.

Next Steps

Access new online resources

EnviroSys 9 features a revamped and expanded support ecosystem. The Help menu within EnviroSys provides direct access to improved online help, the acQuire Knowledge Base and resources like the End User Licence Agreement (EULA).

Our online resources help you quickly resolve common technical issues and gain advanced knowledge about EnviroSys-related topics, and they provide important product information.

Read EnviroSys 9 Product Information

Read detailed EnviroSys 9 Product Information, including technical release notes, through our [Knowledge Base](#). If you don't have a login, please request one [here](#).

Schedule your upgrade

Our Support team will reach out to your EnviroSys Key Technical Contact to schedule your upgrade at a time that suits you best.

Alternatively, if you're ready to get started now, please reach out to us at envirosys.support@acquire.com.au.

Update your EnviroSys mobile app

Your EnviroSys mobile app has also received an update! Simply update to access all the latest enhancements and take EnviroSys on the go.
